# THE NEW EPICENTRE OF THE GLOBAL PLASTICS INDUSTRY

Over the past two decades, accelerated globalization, dynamic foreign and domestic trade policies, significant investments in manufacturing & infrastructure, rapid change in technology and growing innovation across retail, automotive, healthcare, agriculture, aerospace & defence, etc sectors have brought about new changes and abundant opportunities for the Indian plastic industry.

Today, with the paradigm shift in global supply chains, India has emerged as a leading sourcing hub for plastic products ranging from raw materials to semi-finished and finished goods spanning vast applications and industry segments. Continued investments in innovation in materials, processes and products have further catapulted the Indian Plastics industry as a force majeure within the global plastics supply chain; while the Indian Plastics industry continues to dominate world markets for its quality standards, ability to meet voluminous global demands, on timely delivery and commitment to enterprise.
